

PEST CONTROL PROGRAM

CBV/PC/DOC/1.1-00

La Sentinelle Group has appointed Greenline Pest Control Ltd as its licensed, insured and certified pest control service provider. It is agreed that the Greenline Pest Control Ltd will offer monthly pest control services and submit regular reports to management.

All traps, bait stations, glue boards and insectocutors shall be labelled (include PCO initials and date inspected).

The Pest Control Service Provider will carry out regular inspection and these inspections are recorded and tracked.

We use only pesticides from the approved list of pesticides and we keep records of where they are applied and how they are applied.

We also maintain an up-to-date schematic map – map is dated and has all traps, bait stations, glue boards and insectocutors designated and identified in a way to allow for ease of tracking and trending.
