

WATER MANAGEMENT POLICY

This water policy is a key component of La Sentinelle Group Health, Safety and Environment policy which mandates environmental stewardship, environmental protection, and ensures mitigation of harm to people and property. Water resources are an integral part of the business operations of La Sentinelle Group. The responsible use of water, and the safe processing, handling, and disposal of water is necessary to ensure La Sentinelle Group ongoing success. Our obligations include:

Regulatory Compliance:

La Sentinelle Group is committed to complying with or exceeding applicable government regulations and recognized industry standards and practices.

Environmental Protection:

La Sentinelle Group is committed to achieving a high standard of environmental stewardship. We are committed to make environmental protection a consistent component of our corporate decision-making by identifying the potential environmental impacts associated with our activities and taking prudent action to minimize these impacts.

Water Resources:

We recognize that we need water for our operations, and that we must use this resource responsibly and sustainably for continued success. La Sentinelle Group is committed to evaluating solutions and conducting technology trials to find safe, economically viable, and technologically reliable treatments to utilize non-potable water.

Impact Assessment:

La Sentinelle Group is fully committed to minimizing the impact of water usage in our operations. Every operating area will have unique challenges and opportunities which will be identified, and an area impact assessment prepared, incorporating long term plans, water usage demands, storage requirements, infrastructure requirements, and a process for review, benchmarking, and adjustment to respond appropriately.

WATER MANAGEMENT POLICY

Everyone who represents our company has a duty and responsibility to ensure regulations are followed, ensure that our corporate water use practices minimize the impact on the environment and the public, and ensure that internal practices are continually improved to achieve our corporate goals and objectives sustainably and responsibly.
